A journey to natural beauty

REPORT SUMMARY

PATIENT

A 43-year-old female presented with early facial laxity, mild sagging, reduced jawline definition, and hyperpigmentation.

TREATMENTS

Treatment involved **Neauvia Stimulate** (1 ml malar area, 1 ml jawline) using a fanning technique, combined with two sessions of **Zaffiro** infrared tightening and hydroexfoliation with **Skin Brightening**.

RESULTS

After treatment, skin luminosity improved, texture became smoother, and facial contour was enhanced. The combination of PEG-HA filler and infrared therapy demonstrated high efficacy, excellent tolerability, and synergistic rejuvenating effects.

Neauvia products are for trained experts only. Use must follow approved indications and the Instructions for Use (IFU) in accordance to applicable laws and regulations in each country. Physicians are solely responsible for any treatments outside these conditions. The results shown are specific to an individual treatment plan. Treatment decisions must be adapted to each patient, who may respond differently based on numerous factors. Outcomes are variable and not guaranteed.
