Bio-regeneration for lasting impact

REPORT SUMMARY

PATIENT

Healthy 57-year-old woman (Fitzpatrick IV) with hypertrophic tissue and moderate skin laxity, plus texture alterations linked to chronoaging and photoaging.

TREATMENTS

Session 1: Smart Hydro (WaterPeeling), ColdPad, **Neauvia Hydro Deluxe**, non-crosslinked HA with low-concentration CaHA, injected as small papulae using a 32G 2 mm needle (2.5 ml full-face).
Session 2 (1 week later): Smart Hydro >

Zaffiro infrared (40 J, 40 pulses, 30 min) > Smart Hydro > **LaserMe** (35 mJ / 1.5 mm spacing) > **Instant Recovery Mask** > **Ceramide Shield Cream**.

RESULTS

The treatment delivered visible improvements in texture, pore size, and wrinkles, with excellent tolerance. This case exemplifies bioregeneration at its most refined: a layered, science-led protocol where preparation meets precision - and results continue to grow long after treatment.
