Enhancing harmony in lips

REPORT SUMMARY

TREATMENTS

A retrospective study assessed the safety and efficacy of **Neauvia Intense LV** and **Neauvia Intense Lips** in 61 treatments using 124 vials. No major or minor complications, nodules, or granulomas occurred over follow-ups up to 2 years. Subdermal lip injections (linear retrograde, 0.05–0.1 ml per thread, total 0.5–0.8 ml) corrected asymmetry, smoothed wrinkles, and restored natural lip proportions.

RESULTS

The combination restored firmness, improved elasticity, redefined contours, and achieved skin redensification, providing a safe and effective alternative to surgical lifting.

Neauvia products are for trained experts only. Use must follow approved indications and the Instructions for Use (IFU) in accordance to applicable laws and regulations in each country. Physicians are solely responsible for any treatments outside these conditions. The results shown are specific to an individual treatment plan. Treatment decisions must be adapted to each patient, who may respond differently based on numerous factors. Outcomes are variable and not guaranteed.
