Integrated protocols for facial rejuvenation

REPORT SUMMARY

PATIENT

A 51-year-old female (Fitzpatrick II) with Hashimoto's thyroiditis presented with midface sagging, jawline loss, and chrono/photoaging signs.

TREATMENTS

Treatment combined Waterpeeling, **Neauvia Stimulate** filler (PEG-HA + CaHA), **Zaffiro** infrared, and **LaserMe**. Two sessions were performed one

month apart. Retrograde fanning and threading techniques restored malar and mandibular volume, while infrared and fractional laser improved skin laxity, texture, and turgor.

RESULTS

The patient reported high satisfaction with the natural, refreshed, and youthful outcome.

Neauvia products are for trained experts only. Use must follow approved indications and the Instructions for Use (IFU) in accordance to applicable laws and regulations in each country. Physicians are solely responsible for any treatments outside these conditions. The results shown are specific to an individual treatment plan. Treatment decisions must be adapted to each patient, who may respond differently based on numerous factors. Outcomes are variable and not guaranteed.
