LaserMe and Plasma IQ technology for rejuvenation

REPORT SUMMARY

PATIENT

53-year-old male patient with open pores, diffuse spots, fine periocular wrinkles, and prominent forehead and glabellar lines.

TREATMENTS

was treated with **LaserMe** (non-ablative fractional laser, 40 mJ, 1.5 mm spacing, 1 pass, 230 shots) for skin resurfacing and rejuvenation.

RESULTS

The treatment targeted improvement in skin texture, tone, and elasticity. Only one session was performed, avoiding the beard region, and resulted in visible reduction of fine lines, enhanced skin quality, and a more even complexion.
