Latin lips - novel approach for redensation and volumization of lips with pegde crosslinked hyaluronic acid filler

REPORT SUMMARY

PATIENT

Fifty-five female patients seeking lip rejuvenation.

TREATMENTS

Were treated with the Latin Lips technique using **Neauvia Intense Lips** (PEGDE-HA 24 mg/ml). Injections employed a 25 G needle and 27 G cannula with precise microvolumes per lip region.

RESULTS

The protocol restored volume, enhanced definition, preserved natural mobility, and improved plumpness, smoothness, and contour, achieving high patient satisfaction (93%) with minimal swelling, no bruising, and safe, reproducible results.
