Nose correction with Intense LV

REPORT SUMMARY

PATIENT

A healthy 36-year-old male, dissatisfied with his nose and unwilling to undergo surgery.

TREATMENTS

Was treated with 0.6 ml **Neauvia Intense LV** (26 mg/ml PEG-HA) using a 3-point technique (nasal root, tip, base) with a 26G cannula.

RESULTS

This approach, also applied to other patients aged 24–36, was safe, precise, and required no corrections. The procedure delivered natural, long-lasting results, achieving improved nasal contour and high patient satisfaction without downtime or complications.

Neauvia products are for trained experts only. Use must follow approved indications and the Instructions for Use (IFU) in accordance to applicable laws and regulations in each country. Physicians are solely responsible for any treatments outside these conditions. The results shown are specific to an individual treatment plan. Treatment decisions must be adapted to each patient, who may respond differently based on numerous factors. Outcomes are variable and not guaranteed.
