Skin redensification with Zaffiro

REPORT SUMMARY

PATIENT

A 40-year-old healthy female (skin type III) sought natural prevention of premature aging, avoiding fillers or injectables. She presented with sagging, thin skin around nasolabial and lip folds.

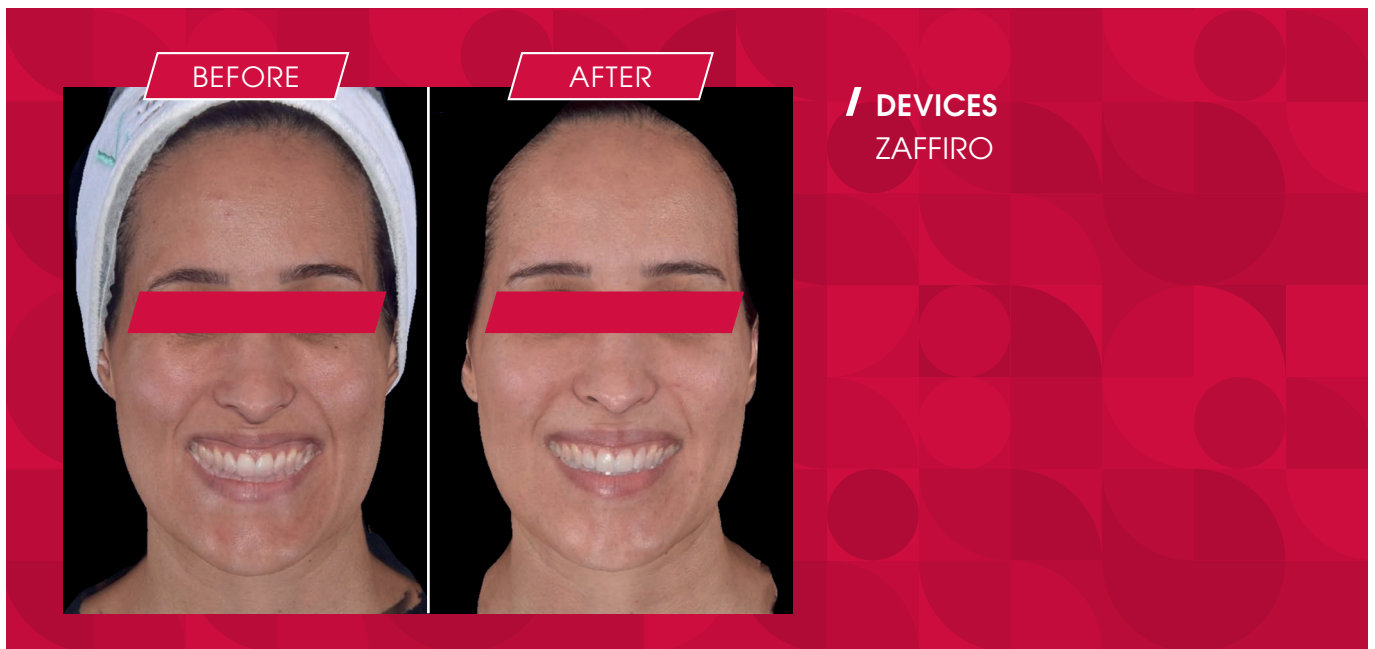

TREATMENTS

Treatment with **Zaffiro** ThermoDeep included 3 sessions (1/month), 60 shots per side to the lower third of the face at 35J. The therapy improved elasticity,

hydration, and firmness, achieving redensification with a volumetric effect comparable to 1 ml of HA filler.

RESULTS

This case demonstrates Zaffiro's effectiveness in natural lifting and skin quality restoration.

Neauvia products are for trained experts only. Use must follow approved indications and the Instructions for Use (IFU) in accordance to applicable laws and regulations in each country. Physicians are solely responsible for any treatments outside these conditions. The results shown are specific to an individual treatment plan. Treatment decisions must be adapted to each patient, who may respond differently based on numerous factors. Outcomes are variable and not guaranteed.
